Products for Cardboard

BD ONDULAND BM

BD ONDULAND BM is a product designed for the preparation of starch glues to be used in making corrugated cardboard. Improving adhesion results even in heavyweight cartons.

Properties

- Fully liquid product, facilitating its application and avoiding the usual solids settling of other commonly used suspensions.
- Product of medium-low viscosity, which facilitates application without using special pumping systems.
- Avoids dust generation of borax decahydrate, thus the risk associated with the operation of dilution is reduced.
- High concentration of boron, which allows working with lower dosages than those usually used with other liquid or suspension products.

Technical characteristics:

Appearance: yellowish liquid

pH (sol. 1%): 9,0

Density at 20°C: 1,37 g/cm³

Viscosity at 20°C: 5 ps

Dosage:

The dosage to be used must be adapted to each installation and type of cardboard to produce.

However, as a rule of thumb, one 1 Kg of BD ONDULAND BM equals 1 kg of Borax 10-H.
